**PLANET  
OF THE  
APES**

**FIVE NEWLY EDITED MOVIES  
FILLED WITH ACTION,  
ADVENTURE AND EXCITEMENT!  
THE WHOLE FAMILY WILL GO WILD  
OVER THEM!**

The action's non-stop in each of these special two hour movies. The story begins deep in outer space. Two human astronauts slip through a time warp while on a routine space mission and when they return to earth they discover they are living 2000 years in the future—and that the planet is being ruled by apes! These newly edited movies are dramatic, exciting—and intensely involving. The astronauts are aided by Galen, an intellectual ape who becomes an outcast from his own society. Ursus, the ape chief of police, wants the astronauts captured, fearing they might inform the presently inferior humans that they, themselves, once ruled the earth. With this information, the humans might again rise to power; therefore, the astronauts and Galen live like fugitives. Their struggle for survival will keep the whole family engrossed in these adventure-packed movies.
