

CORNELIUS

PLANET OF THE APES

Sacred Instructions:

First, it's recommended that you print Cornelius out on cardstock, for anything else would be heresy.

Cut out all of the ape parts (and slice the blue slits) using an exacto blade, as ordered by the Lawgiver.

For crisper folds, lightly score each fold line with that same exacto blade. Just as a good simian would!

Once you've carefully glued and constructed each part separately, begin fitting each piece into the torso, gluing and inserting tabs into the pre-cut slits along the way.

NEVER take your ape model into the Forbidden Zone.
